Professional Experience

Job title **Senior IBM Lotus Notes and Domino Consultant**
Industry ICT
Period March 2008 - now

- Perform various activities at several customer sites on a freelance base. These activities mainly aim at the **IBM Lotus** product group:
 - **Lotus Notes & Lotus Domino**
 - **Lotus Quickr**
 - **Lotus Sametime**
 - **Lotus Enterprise Connector (LEI)**
- Specialized in developing in Lotus Notes and Lotus Domino. Examples of developed solutions are:
 - **Human Resources work flow** application with an employee 'self service' portal
 - **Microsoft Office integration** for an automated quoting system
 - A tailor made **Document Management System**
- Small ad hoc application support and projects in the role of senior technical consultant.
- Migration projects from **Microsoft Sharepoint** to **Domino.doc** or **Lotus Quickr** and vice-versa.
- Upgrade an application and mail environment from Lotus Notes 6.5 to 8 Lotus Notes and **Citrix**
- Implement vendor selection for various **XML web services** within labour market. Head engineer of the integration of these services in the back office system.
- Developing 'proof-of-concept' demonstrations with **VMWare** environments

Project examples

- Migration of a large **Lotus Domino Document Manager** (Domino.doc) environment to **Microsoft Office Sharepoint Server** (MOSS) for a internationally renowned HR consulting firm. Successfully migrated more than 250Gb of documents and meta data
- **Application manager** for a enterprise application (250+ end-users) at a key-player in the Dutch recruiting market. Keeping the system up-to-date with fresh ideas. All processes were **ITIL** proof
- Developing and maintaining a reservations portal for booking conference and meeting locations at a Dutch hotel chain. All project steps were done using the PRINCE2 project management method
- Creating proof-of-concept presentations and demonstrations for **Lotus Quickr** and **Lotus Domino** using a virtual **VMWare** environment
- Design, implement, configure and maintain a Lotus Domino/Notes environment on Linux for a consulting firm based in Eindhoven, The Netherlands. This environment consist of a SMTP server, Lotus Sametime instant messaging server and various intranet and internet websites.
